INTRODUCING THE NEW HAMILTON MEMORIAL HOSPITAL!

With great excitement and pride, we at Hamilton Memorial Hospital are proud to introduce to the area a brand new state-of-the-art hospital equipped to meet your family's healthcare needs. We realize that caring for your family is a tremendous responsibility that we take very serious as nothing is more important than our loved ones. This responsibility is the reason we made a commitment to build a modern hospital to deliver excellent medical care to the surrounding area.

The new Hamilton Memorial Hospital was designed with your care in mind. A new large Emergency Room (ER) is located at the front of the hospital for quick access while Laboratory and Radiology services are located next to the ER and close to the new beautiful clearstory entrance to alleviate patient travel time. Physician clinic services are attached to the hospital allowing easy patient flow to and from the hospital for clinical services after your physician visit.

In addition, a new surgery center is available to provide the highest quality surgical procedures in a modern, safe environment. For inpatient comfort and healing, private patient rooms are available. The addition includes the only Aquatic therapy pool in the area allowing patients the best recovery potential after an injury. Cardiac Rehab and Sleep Studies are also available to meet your needs.

We want to share our excitement by sending you this brochure which gives you an overview of the new hospital and describes the various new additions to the facility. We invite you to the new Hamilton Memorial Hospital the next time you need medical services or to just come and see what a new modern hospital looks like.

Please feel free to contact me if you have any questions or comments about the new Hamilton Memorial Hospital.

Sincerely,

Randall W. Dauby
Chief Executive Officer

Welcome to the new Hamilton Memorial Hospital District!

On behalf of our Employees, Physicians and Board of Directors, we are so excited that you have chosen Hamilton Memorial Hospital District for your family's healthcare needs. We realize that caring for you and your family is a tremendous responsibility that we take very serious as nothing is more important than our loved ones. This responsibility is the reason that HMHD opened its doors almost 50 years ago and the reason we still strive to deliver excellent medical care to the people of Hamilton County and the surrounding areas.

This same commitment is the reason our Board of Directors decided to undertake this important and necessary construction project that nearly doubled the size of our facility. Advances and changes in treatments and technologies over the past half century have dramatically changed the way healthcare is delivered. As we tried to keep up with these changes it became apparent to us that our existing facility was not adequate. Therefore, after much evaluation, it was determined this expansion project was necessary to meet the continually changing dynamics of today's healthcare market. The result of this expansion and renovation will virtually be a new hospital that will improve our ability to diagnose injuries and illnesses and enhance our ability to care for patients.

Our staff shares the belief that healing begins in a caring and friendly environment and our new facility was designed with your care in mind. The facility has been designed to better meet patient needs by locating some of the most utilized services (such as Radiology and Laboratory) close to the new main entrance and the new Emergency Department. The new Hamilton Memorial Family Clinic will be literally down the hall from the many outpatient services your physician may order during your visit. For patients requiring a stay in the hospital, the facility is being redesigned to include private rooms with showers and a designated area for family members.

The new facility will also allow us to expand our services into areas such as Cardiac Rehabilitation, Sleep Studies, Aqua Therapy in our new therapy pool and many other areas. This allows you and your family the convenience of having more services performed locally when the need arises. Also, our new facility will feature greater privacy, security and treatment efficiencies all designed with increased comfort and improved care in mind.

Finally, we are so fortunate in our community to have a local hospital managed and staffed by local people who care deeply about providing high-quality care to the residents of our area. Our staff of highly trained and qualified professionals have a deep commitment to our patients, the Hospital District and the communities in our area. We are blessed to have such a caring group of individuals and this new facility would not have been possible without their commitment.

I hope you are as proud of our new facility as I am.

As you look through the attached brochure, please feel free to contact me if you have questions or comments.

Sincerely,

Randall W. Dauby, CEO
Hamilton Memorial Hospital District
